the positive pressure demand mode when fighting fires.

**Unusual Fire and Explosion Hazards:** Vapor may travel to source of ignition and flash back. Vapor may settle low or in confined spaces. May produce a floating fire hazard. Static ignition hazard can result from handling and use. Essential and vegetable oils have the potential to self-heat and contribute to spontaneous combustion when present on fabrics. Caution should be exercised in the storage and launder of fabrics exposed to oils.

**PPE and Precautions for Firefighters:** Static charges generated by emptying package in or near flammable vapor may cause flash fire. Use water spray to cool unopened containers.

## Section 6. Accidental Release Measures

**Personal Precautions:** Keep unnecessary personnel away. Eliminate all sources of ignition. Avoid contact with skin or inhalation of spillage, dust or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them.

**Environmental Precautions:** Prevent further leakage or spillage if safe to do so. Do not contaminate water. Do not allow to enter sewers/surface or ground water. Retain and dispose of contaminated wash water. Contact local authorities in case of spillage to drain/aquatic environment.

**Containment:** Absorb with clay, sand, or other non-combustible material. Prevent entry into waterways, sewers, and confined areas.

**Clean Up:** Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb with inert absorbent such as dry clay, sand or diatomaceous earth, commercial sorbents, or recover using pumps. The product is immiscible with water and will spread on the water surface.

## Section 7. Handling and Storage

**Handling Precautions:** Avoid contact with eyes and mucous. Keep container closed. Handle containers with care. Open slowly in order to control possible pressure release. Ensure good ventilation/exhaustion at the workplace. Keep ignition sources away – Do not smoke. Protect against electrostatic charges.

**Storage Precautions:** Store in a cool, dry, well ventilated location. Do not handle or store near an open flame, heat or other sources of ignition.

Take precautionary measures against static discharges. Keep receptacle tightly sealed.  
**Other:** See Section 8

### Section 8. Exposure Controls/Personal Protection

**Engineering Controls:** Exhaust ventilation or other engineering controls to keep vapor concentration below their respective threshold limit value. Ensure eyewash stations and safety showers are proximal to the work station. Use explosion-proof ventilation equipment to stay below exposure limits.

**Respiratory Protection:** In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air.

**Hand Protection:** Protective gloves should be worn.

**Eye Protection:** Tightly sealed goggles. Eyewash bottle with clean water.

**Skin and Body Protection:** Clothes for chemical protection to avoid contact. Use of an impervious apron is recommended. Wear appropriate thermal protective clothing, when necessary

**Ingestion:** Do not eat, drink and smoke while using

**Industrial Hygiene:** When using, do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.
